

ΔΡΑΣΤΗΡΙΟΤΗΤΕΣ

1. Να υπολογίσεις το γινόμενο.

$$7 \times 1 = \underline{\hspace{2cm}}$$

$$7 \times 10 = \underline{\hspace{2cm}}$$

$$7 \times 100 = \underline{\hspace{2cm}}$$

$$9 \times 1 = \underline{\hspace{2cm}}$$

$$9 \times 10 = \underline{\hspace{2cm}}$$

$$9 \times 100 = \underline{\hspace{2cm}}$$

$$8 \times 1 = \underline{\hspace{2cm}}$$

$$8 \times 10 = \underline{\hspace{2cm}}$$

$$8 \times 100 = \underline{\hspace{2cm}}$$

$$12 \times 1 = \underline{\hspace{2cm}}$$

$$12 \times 10 = \underline{\hspace{2cm}}$$

$$12 \times 100 = \underline{\hspace{2cm}}$$

2. Να συμπληρώσεις.

$$(\alpha) 2 \times 100 = \underline{\hspace{2cm}}$$

$$(\beta) 100 \times 3 = \underline{\hspace{2cm}}$$

$$(\gamma) 10 \times 4 = \underline{\hspace{2cm}}$$

$$(\delta) 7 \times 100 = \underline{\hspace{2cm}}$$

$$(\epsilon) \underline{\hspace{2cm}} \times 100 = 80$$

$$(\sigma\tau) 9 \times \underline{\hspace{2cm}} = 900$$

$$(\zeta) 13 \times 10 = \underline{\hspace{2cm}}$$

$$(\eta) \underline{\hspace{2cm}} \times 5 = 500$$
